All the Tables are based on the Census "short form" (i.e. 100% of households).

EXECUTIVE SUMMARY

The Manitoba Bureau of Statistics has prepared this Manitoba Age Demographics 2001 based on the 2001 Census "short form" (i.e. 100% of households). It provides data by age and sex for Manitoba, the eight Economic Regions, Census Divisions and Census Sub-Divisions. There are comparisons between the 1996 Census and the 2001 Census, as well as between Census Sub-Division Types (e.g. Cities, Towns, Villages and Indian Reserves). Data is presented both in tabular format and as a series of charts, including geographic maps.

Some highlights from the report include:

- Manitoba's median age of 36.8 years in 2001 was 2.1 years higher than the 1996 value of 34.7, and was 0.8 years below the Canada level of 37.6. Manitoba's median age for 2001 had a rank of third when compared to other provinces, a decrease of one place from the rank of fourth in 1996. The median age for Manitoba males in 2001 was 35.8 years, while Manitoba females had a median age of 37.8 years, both of which were below their respective Canada levels of 36.8 and 38.4.

- In 2001, the 0 to 14 years old age group made up 20.9% of the total population count. The 15 to 64 year olds made up 65.2% of the total, and the 65 years old and over group made up 14.0%. Over the five year span from 1996 to 2001, the 0 to 14 years old group decreased -1.1 points from a level of 22.0% in 1996. The 15 to 64 years old age category gained 0.8 points from it's 1996 level of 64.4%. In the 65 years old and over group, the share increased 0.3 points from the 1996 value of 13.7%.

- The Economic Regions with the largest population count were Winnipeg with 621,451 persons and the Southwest (103,020 persons). The least populated regions of the province were Parklands (44,253 persons) and North Central with 47,389 persons. The North region had the youngest median age at 26.0 years, while the Parklands region (41.9 years) had the oldest median age. The Winnipeg region ranked fifth with a median age of 37.3 years. Youth Dependency rates were highest in the North region (52.7%). South Central (39.4%) had the next highest rate, 13.3 points lower than the North. Youth Dependency was lowest in the Winnipeg region at 28.0%. Senior Dependency rates were highest in the Parklands region (35.8%) and lowest in the North (8.3%). Total Dependency rates ranged from a high of 68.8% in the Parklands region, to a low of 49.1% in the Winnipeg region.

Notes to Users:

Coverage

It is important to note that although every effort is taken to ensure the quality of the 2001 Census, the data is still subject to error. In general, the following types of error occur: coverage, non-response, response, processing and sampling.

The population counts provided in this document are most influenced by the coverage errors. Coverage error occurs when persons or dwellings are missed, incorrectly enumerated or counted more than once. Statistics Canada conducts three studies in order to estimate the coverage error. The Dwelling Classification Study confirms the vacant/non-vacant status of dwellings, and the resulting information is used to adjust the final census counts. The Reverse Record Check Study estimates the residual undercoverage (persons missed) for Canada, and each of the provinces and Territories. The Overcoverage Study (persons incorrectly enumerated or counted more than once) estimates the overcoverage error. The Reverse Record Check and the Overcoverage are taken together to estimate the net undercoverage. Population estimates based on the 2001 Census including net undercoverage should be available in September 2003.

Random Rounding

It is also important to note that Statistics Canada applies a procedure known as "Random Rounding" in order to ensure confidentiality standards are met. This procedure randomly rounds the population counts (including totals) either up or down to a multiple of 5 or, in some cases 10. As a result, there are instances where the sum of the values will not equal the total listed.

Incomplete or Unenumerated Indian Reserves

In Manitoba, the Indian Reserve Dakota Tipi 1 was unenumerated in the 2001 Census. In the 1996 Census both Dakota Tipi 1 and Jackhead 43 were unenumerated. In the 1991 Census Roseau Rapids 2A, Roseau River 2 and Valley River 63A were unenumerated.

PROVINCIAL HIGHLIGHTS

Manitoba's population count increased by 2.5% during the last decade, from 1,091,940 in 1991 to 1,119,580 in 2001.

The youth population count (0 to 14) decreased by 2.5% over the last decade, while the working age population count (15 to 64) increased by 3.4% over the last 10 years. The seniors population count (65 and over) increased by 6.7% over the same time period.

Age Group	Percent Change 1991 to 2001
0 to 4	-14.0%
5 to 9	0.0%
10 to 14	7.0%
15 to 24	-3.7%
25 to 34	-22.0%
35 to 44	9.2%
45 to 54	43.3%
55 to 64	8.8%
65 to 74	-4.9%
75 to 84	16.6%
85 and Over	38.1%
Total	**2.5%**
0 to 14	-2.5%
15 to 64	3.4%
65 and Over	6.7%

Median age is the point where exactly one half of the population is older, and the other half is younger. An increase is one of many indicators that Manitoba's population is aging. An aging population has implications for Manitoba's labour force, economy, social services and health care systems.

The median age of Manitoba's population count increased a record 3.8 years during the past decade, from 33.0 years to 36.8, the province's highest 10-year growth this century. However, it was still lower than the national average of 37.6 years, according to the 2001 Census.

Manitoba's age profile is heavily influenced by the profile of the Aboriginal population. The median age of the Aboriginal population count in Manitoba is 22.8 years, whereas the median age of the Non-Aboriginal population is 38.3 years, a year older than the Canadian average.

In 2001, young people aged 19 and under accounted for 28% of Manitoba's population count. Individuals aged 20 to 64 made up 58%, while seniors aged 65 and over made up 14%.

The Census showed significant shifts among various age groups during the past decade. For example, the number of pre-school children aged four and under declined 14% from 82,135 to 70,670. There were also substantial increases among the elderly. The number of people aged 80 and over increased 30% from 34,025 to 44,205

Manitoba's working-age population is increasingly made up of older individuals. The number aged 25 to 34, the young working-age population, declined 22% during the past 10 years. At the same time, the population aged 45 to 64, the oldest working-age group, rose 28%.

Manitoba's dependency ratio (share of youth and seniors to working age) fell 1.8% from 55.3% in 1996 to 53.5% in 2001.

The 2001 Census counted 569,985 women and 549,600 men in Manitoba. Of these, 170 women and 45 men were aged 100 and over.

Manitoba's median age of 36.8 years in 2001 was 2.1 years higher than the 1996 value of 34.7, and was 0.8 years below the Canada level of 37.6. Manitoba's median age for 2001 had a rank of third when compared to other provinces, a decrease of one place from the rank of fourth in 1996. The median age for Manitoba males in 2001 was 35.8 years, while Manitoba females had a median age of 37.8 years, both of which were below their respective Canada levels of 36.8 and 38.4.

Manitoba's Total Dependency rate, the number of persons 0 to 14 or 65 and over divided by the number of persons 15 to 64, decreased 1.8 points over the last 5 years, from 55.3% to 53.5%. Youth Dependency in Manitoba, the number of persons 0 to 14 divided by the number of persons 15 to 64, decreased by 2.1 points from 34.1% in 1996 to 32.0% in 2001. Senior Dependency, the number of persons 65 and over divided by the number of persons 15 to 64, remained relatively stable, increasing 0.2 points from 21.2% in 1996 to 21.4% in 2001.

From 1996 to 2001, the 50 to 54 year old age group had the highest percent change with a growth of 27.7% for Both Sexes. The 30 to 34 year old age group had the lowest percent change with a decrease of -18.4%. These changes are reflected in the change in population count distribution from 1996 to 2001. For Both Sexes, the 50 to 54 year old age group had a 1.4 point increase in share, from 5.2% in 1996 to 6.6% in 2001. At the other extreme, the 30 to 34 year old age group decreased by -1.5 points, from 8.0% to 6.5%.

In 1996, the male to female ratio ranged from a high of 104.6% for 0 to 4 year olds, to a low of 27.3% for the 100 years and over age group. In 2001, the 0 to 4 year olds had the highest ratio once again at 106.2% (an increase of 1.5 points), while the 100 years and over group had the lowest with 26.5% (a decrease of -0.8 points). Over the five-year period from 1996 to 2001, the 70 to 74 year old age group had the highest change in point value with a 5.9 point increase, from 77.4% to 83.3%. At the other end of the spectrum, the 35 to 39 year old age group had a decrease of -2.4 points, from 100.4% to 98.0%.

In 2001, the 0 to 14 years old age group made up 20.9% of the total population count. The 15 to 64 year olds made up 65.2% of the total, and the 65 years old and over group made up

14.0%. Over the five year span from 1996 to 2001, the 0 to 14 years old group decreased -1.1 points from a level of 22.0% in 1996. The 15 to 64 years old age category gained 0.8 points from it's 1996 level of 64.4%. In the 65 years old and over group, the share increased 0.3 points from the 1996 value of 13.7%.

REGIONAL HIGHLIGHTS

This report presents data for Manitoba's eight Economic Regions. The eight Regions (also known as Official Regions for Data Collection) are aggregations of the 23 census divisions as follows:

Economic Region	Census Division
Southeast	1, 2, 12
South Central	3, 4
Southwest	5, 6, 7, 15
North Central	8, 9, 10
Winnipeg	11
Interlake	13, 14, 18
Parklands	16, 17, 20
North	19, 21, 22, 23

The regions with the largest population count were Winnipeg with 621,451 persons and the Southwest (103,020 persons). The least populated regions of the province were Parklands (44,253 persons) and North Central with 47,389 persons. The North region had the youngest median age at 26.0 years, while the Parklands region (41.9 years) had the oldest median age. The Winnipeg region ranked fifth with a median age of 37.3 years. Youth Dependency rates were highest in the North region (52.7%). South Central (39.4%) had the next highest rate, 13.3 points lower than the North. Youth Dependency was lowest in the Winnipeg region at 28.0%. Senior Dependency rates were highest in the Parklands region (35.8%) and lowest in the North (8.3%). Total Dependency rates ranged from a high of 68.8% in the Parklands region, to a low of 49.1% in the Winnipeg region.

Census Division 19 had the youngest median age at 22.8 years. This was reflected in the fact that it also had the highest rate of Youth Dependency (64.1%) and one of the lowest rates of Senior Dependency (9.3%). Only Divisions 23 (5.9%) and 22 (5.2%) had lower values of Senior Dependency. Census Division 1 had the oldest median age with 43.7 years. The lowest rates of Youth Dependency were in Divisions 11 and 1 with 28.0%. With a rate of 36.9%, Census Divisions 15 and 17 had the highest rate of Senior Dependency. Total Dependency reached a high of 73.4% in Census Division 19 and a low of 48.8% in Division 13.

With 718,556 persons, Cities had the largest share of Manitoba's population count. Rural Municipalities were next with 237,878 persons. The smallest shares of Manitoba's population count were in Local Government Districts (1,579 persons) and Indian Settlements (1,020 persons). Median age was youngest in Indian Settlements and Reserves with 20.4 and 20.6 years respectively. Villages (44.1 years) and Local Government Districts (48.6 years) had the oldest median ages. With 65.3% and 68.4% respectively, Youth Dependency was highest in Indian Settlements and Reserves. These rates were over twice those of Manitoba (32.0%) as a whole. With 3.2% in Indian Settlements, and 6.9% in Indian Reserves, Senior Dependency rates were over half those of Manitoba (21.4%). At 22.7%, Local Government Districts had the

lowest rate of Youth Dependency. The highest rate of Senior Dependency was recorded in Villages (46.6%). Total Dependency ranged from a low of 50.0% in Cities to a high of 79.2% in Villages.

The median age in Cities ranged from 29.7 years in Thompson to 44.5 in Dauphin. Thompson had the highest rate of Youth Dependency with 40.4%, while Winnipeg had the lowest with 28.1%. Senior Dependency was lowest in Thompson (3.5%) and highest in Dauphin at 48.3%. Total Dependency was highest in Dauphin at 77.4%, and was lowest in Thompson (43.9%).

The median age in Towns ranged from 25.3 years in Plum Coulee to 59.5 years in Grandview. Youth Dependency ranged from 15.2% in Winnipeg Beach, to 57.8% in Gretna. Senior Dependency reached a low of 1.1% in Leaf Rapids and a high of 92.0% in Grandview. The lowest rate of Total Dependency was in Leaf Rapids with 36.7%, while the highest rate was recorded in Pilot Mound (125.9%).

In Villages, the median age ranged from a low of 34.5 years in Riverton to a high of 57.0 years in McCreary. Youth Dependency was highest in Riverton (45.7%) and lowest in Dunnottar (15.4%). Senior Dependency reached a high of 84.8% in McCreary, and a low of 19.6% in Powerview. In McCreary the Total Dependency rate was the highest at 113.0%, while in Dunnottar the Total Dependency was the lowest with 47.7%.

Within Rural Municipalities, the median age reached a high of 55.0 years in Victoria Beach, and a low of 24.8 years in Stanley. The lowest rate of Youth Dependency was in Victoria Beach (18.8%) while the highest was in Stanley (53.2%). Senior Dependency ranged from a low of 6.1% in Stanley to a high of 64.8% in Harrison. Total Dependency was lowest in Headingley with 36.0% and highest in Harrison at 89.8%.

The Pinawa Local Government District with a median age of 47.9 years was younger than Mystery Lake with 55.5 years. Mystery Lake had a lower rate of Youth Dependency than Pinawa with 7.1% compared to 23.8%. Senior Dependency was highest in Pinawa (23.8%) while Mystery Lake had a lower rate of 14.3%. Mystery Lake's Total Dependency rate of 21.4% was over half that of the 47.6% in Pinawa.

Within Indian Reserves the median age reached a low of 11.5 years, the lowest in Manitoba, in Gambler 63. A high of 39.0 years was reached in Opaskwayak Cree Nation 21I. Youth Dependency rates ranged from 300.0% in Gambler 63 to 21.1% in Opaskwayak Cree Nation 21I. Senior Dependency rates reached a high of 33.3% in Gambler 63 and a low of 0.0% in Dauphin River 48A. Gambler 63 had the highest rate of Total Dependency with 333.3%, while Opaskwayak Cree Nation 21I had the lowest at 26.3%.

The median age in Indian Settlements ranged from a high of 27.5 years in Illford, to a low of 18.5 years in Granville Lake. Youth Dependency rates were highest in Granville Lake (70.0%) and lowest in Illford (64.7%). In Illford, Senior Dependency rates were the highest at 5.9%, and in Granville Lake (0.0%) they were the lowest. Total Dependency reached a high of 70.6% in Illford, and a low of 68.0% in South Indian Lake.

In the Unorganized part of Manitoba, the median age ranged from a low of 23.5 years in Division 23 to a high of 56.5 years in Division 18, East. Youth Dependency was highest in Division 19 (54.4%) and was lowest in Division 18, East (0.0%). Senior Dependency reached

a high of 29.4% in Division 1, and a low of 0.0% in Division 17. In Division 19 Total Dependency reached it's highest at 70.7%, while in Division 17 it reached it's lowest (22.2%).

DEFINITION OF TERMS

Median Age – The point where exactly one half of the population is older, and the other half is younger.

Youth Population – The population aged 14 years and under.

Working Age Population – The population aged 15 to 64 years.

Senior Population – The population aged 65 years and over.

Youth Dependency Rate – The ratio of Youth Population to Working Age Population, as a percentage.

Senior Dependency Rate – The ratio of Senior Population to Working Age Population, as a percentage.

Total Dependency Rate – The ratio of the sum of the Youth and Senior Populations to the Working Age Population, as a percentage.

Census Net Undercoverage – Those persons counted more than once, less those missed. See the Notes to Users section for more detail.

Random Rounding – The Statistics Canada procedure that randomly rounds data to a multiple of 5, and in some cases 10. See the Notes to Users section for more detail.
